EDUCATION

B.Tech in Computer Science and Engineering **Since 2022**
Lovely Professional University, CGPA: 7.39
Intermediate (PCM and Computer SCI.) **2020-2022**
Kendriya Vidyalaya, Gujarat, Percentage: 75
Matriculate **2019-2020**
Kendriya Vidyalaya, Gujarat, Percentage: 89.4

SKILLS

Programming Languages	Python, C++, C, Java
Frameworks/Libraries	Pandas, NumPy, Matplotlib, Seaborn, Plotly, scikit-learn, TensorFlow, OpenCV, Bootstrap, React.js
Tools/Platforms	MySQL, AutoCAD, Arduino
Soft Skills	Strong interpersonal skills, Analytical and Critical thinking, Team collaboration

PROJECTS

Dependency Sensitive CNN for Modeling Sentences and Documents GitHub Link **NOV, 2024**

- Developed a Dependency Sensitive Convolutional Neural Network (DSCNN) leveraging LSTM for capturing long-term dependencies and convolutional operations for attribute extraction, outperforming traditional CNN models in sentiment analysis, question classification, and subjectivity classification.
- Enhanced performance in text classification tasks by integrating sentence dependencies and intersentence correlations, surpassing traditional models.
- **Technologies Used**: DSCNN, LSTM, CNN, NLP, TensorFlow/Keras.

Movie Recommendation System using Machine Learning GitHub Repository Link **NOV, 2024**

- Developed a personalized movie recommendation system using collaborative filtering techniques to predict user preferences based on ratings data.
- Achieved a 10% improvement in MAE and enhanced RMSE, demonstrating the effectiveness of collaborative filtering and matrix factorization for accurate movie recommendations.
- **Technologies Used**:Machine learning (collaborative filtering, matrix factorization), Python, Pandas, and Scikit-learn, MAE and RMSE metrics.

Smart Dustbin GitHub Repository Link **DEC, 2023**

- Collaboratively engineered an automated waste management system in a team of 3 using Arduino and Ultrasonic Sensors, enabling touchless lid operation and efficiently improving hygiene.
- **Technologies Used**: Arduino, Ultrasonic Sensors, Servo Motor, C++, Embedded Systems.

ACHIEVEMENTS

Research Paper Publication Paper Link **JAN, 2025**
A Hybrid Evaluation Approach for Text Generation: Combining Automatic Metrics and Human Feedback in NLP Models.
Authors: Ankit Kumar, Gourab Paul, Hitesh Yadav, Enjula Uchoi, Bhupinder Singh
Published in: GRENZE International Journal of Engineering and Technology. ISSN: 2395-5295(Online);

CERTIFICATES

- **Machine Learning** - Deeplearning.AI Certificate **MAR, 2025**
- **Data Visualization Fundamentals** - Microsoft Certificate **MAR, 2025**
- **Cloud Computing** - NPTEL Certificate **MAR, 2025**
- **Algorithms Specialization** - Stanford Online Certificate **NOV, 2023**
- **Programming in C++: A Hands-on Introduction** - Codio Certificate **NOV, 2023**
